## Profile

I'm a **full-stack engineering manager**, who more focusing on high load scalable back-end Java development, with the expertise of building single-page applications (SPA) using the latest front-end technologies (ex. Angular/React) include a deep knowledge of CI/CD and production-grade container orchestration (Kubernetes).  
10+ years of experience.

Speaking languages:

- Russian (native)
- Mandarin Chinese (fluent)
- English (professional)

## Technical Skills

Programming languages:	Java, Groovy, Kotlin, JavaScript, TypeScript, Bash
Back-end technologies:	Spring Boot, Spring Framework, Spring Cloud Data Flow, Project Reactor, Hibernate, Guava, Flyway, GraphQL, gRPC, Elasticsearch, Node.js, Express
Front-end technologies:	Angular, React, Electron, SCSS, LESS Experience in creating cross-browsers websites responsive/adaptive designs and cross-platform desktop applications.
Mobile development:	Android
Messaging/Streaming:	RabbitMQ, Kafka
Testing:	JUnit 5 Platform, Mockito, Selenium
Databases:	PostgreSQL, MariaDB, MongoDB, Redis
Build Systems:	Gradle, Maven
Web Servers:	nginx, Undertow
Automation & Orchestration:	Kubernetes, Helm, Docker, Ansible, Terraform
CI/CD:	GitLab, Jenkins
OS experience:	macOS, Debian, CentOS, CoreOS Container Linux, Gentoo
Cloud:	AWS, Google Cloud, Alibaba Cloud
IDE, tools:	IntelliJ IDEA, Git
Methodologies/Paradigm:	OOP (Object Oriented Programming), Functional programming, Reactive programming, TDD (Test driven development), Multi-threading and parallel programming

## Career Related Experience

### VP of Engineering

Scentbird, New York, USA

March 2017 — present

*Scentbird is a rapidly growing subscription for luxury fragrances. Each month members get a 30-day supply of a perfume of their choice (D&G, Gucci, Guerlain, etc). Scentbird has been featured in Forbes, Harper's Bazaar, Inc, InStyle, Glamour, Business Insider, Teen Vogue, TechCrunch, Observer, VentureBeat, Huffington Post, Fashionista, xoVain, Latina magazine and other notable publications. Scentbird is backed by Y Combinator, 500 startups, Funders Club, TMT Investments, Emmet Shear, Tikhon Bernstam and other notable investors.*

- As a technical leader, I hired, trained, and continue to lead the Engineering team through the continuous delivery of highly-performant software.
- Provide direction and vision for current and future technology and security needs.
- Led and code together with the team multiple key service integrations that lead to increased organizational efficiency and product offerings.
- Directed the high-quality completion of software and database development.
- Led remote agile teams focused on business objectives and tracked progress to ensure project deliverables were completed on time, on budget, and met the business needs.
- Led and actively contribute with writing code and tests during the launch of new projects.
- I and my team developed the in-house Warehouse Management System.
- Lead and developed the integration with a new payment gateway.
- Migrate the company's infrastructure from AWS Beanstalk to Kubernetes, which reduced infrastructure costs significantly.
- Adopt Angular and TypeScript, which becomes the de facto standard for developing back-office applications within the company.
- Migrate to GitLab and introduce per-commit continuous integration and continuous deployment.
- Lead Open-Source initiative inside the company.

## Senior Software Engineer

**Scentbird**, New York, USA

December 2015 — March 2017

- Understand and collaborate on complete product lifecycle from concept to execution.
- Build, develops and manages engineering team capable of carrying out initiatives.
- Recommends new technology and ideas to improve sprints and efficiency.
- Work collaboratively with other developers, UX designers, business and systems analysts to achieve goals.
- Grow engineering teams by interviewing, recruiting and hiring.
- Researching, designing, implementing and managing software programs. Testing and evaluating new microservices.

## Senior Full-Stack Developer

**Goyoo Networks - XiaoYun**, China Beijing, Shenzhen

July 2015 — December 2015

*XiaoYun, an Goyoo Networks company, provides services for Internet cafés, schools and other digital outlets. The content and services are offered through its nationwide distribution platform, multi-level business management platform and proprietary payment and settlement network.
